Plan Check License Policy

- The Plan Check License is intended only for professional engineers working for publicly funded agencies performing the tasks of reviewing submitted structural calculations. The license is not available to contract plan check organizations who work "for profit".
- The license has a set expiration date (one year) at which time the software will stop functioning completely. License renewal reminder messages will be given to the user starting approximately 45 days prior to license expiration. Renewals for Plan Check licenses are issued by request only.
- The city or county agency that requested this Plan Check License is free to install the software on all computers in that department.
- Technical assistance for Plan Check license is provided at no charge using email to support@enercalc.com on a time-available basis. Support fees may be required if extensive assistance is needed and will be at the decision of ENERCALC.
- Printouts from the Plan Check Version will have a background "watermark" stating it is a plan check license. These watermarks are designed to be clearly visible to prevent commercial usage but also blend into the background so the printouts can still be easily read.
- Plan Check License may NOT BE USED to produce calculations that will be used as contract documents or calculations for any structural design. It may ONLY be used to perform mathematical calculations to assist in the plan check task. *Licensing policy is subject to change without notice.*

Acceptance of License Terms

I hereby state that I have the authority to engage in this agreement for the plan check agency described above and agree to the above license policy and all terms in the ENERCALC software license.
